

A sample page from: The 200 Year Ephemeris

by Hugh MacCraig

One year per page, positions given as of the first of the month, for all planets, including Pluto, the Moon & the Node (mean). Stations include date & positions, as do eclipses. Declinations the first of every month (no Moon), Latitudes first of every month (no Sun nor Moon). If you don't have a computer program, it is possible to calculate reasonably accurate charts with this book.

Hey history buffs: Ever wonder what sort of day Napoleon had at Waterloo? How about the first shot at Fort Sumter in 1861? When Bell said, "Watson, come here, I want you," did you ever wonder who, exactly, he was talking to? Find out the astrological answers to these & many other questions!

1837

GEOCENTRIC LONGITUDE OF PLANETS
